## Section 11 *Toxicological Information*

- **Information on toxicological effects:** No hazardous effects known, if used under normal conditions

“Non-fibrous forms of SiC, sometimes referred to as “angular” particles, are irregular in shape and occur as respirable and non-respirable particles. The non-fibrous forms of SiC have very low toxicity in humans and experimental animals. The TLV-TWA for non-fibrous forms is therefore set at the level of “poorly” soluble particles, not otherwise specified (PNOS), being 10 mg/m<sup>3</sup> for inhalable particles, and 3mg/m<sup>3</sup> for respirable particles.” (ACGIH toxicology review 2001)

- Acute toxicity:** No harmful effects identified
  - Irritation:** No harmful effects identified
  - Corrosivity:** No harmful effects identified
  - Sensitisation:** No harmful effects identified
  - Repeated dose toxicity:** No harmful effects identified
